## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions that are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-7, drawn to compositions comprising inositolphosphoglycan (IPG) and ribose.

Group II, claims 8-14, drawn to methods for preparing a medicament by providing inositolphosphoglycan (IPG) with a pharmaceutically acceptable excipient.

Group III, claims 15-17, drawn to methods for preserving organs for transplantation using the medicament of Group II.

Group IV, claims 18-25, drawn to methods of reducing loss of cellular ATP using inositolphosphoglycan (IPG).

The inventions listed as Groups I, II, III and IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: unity of the invention exists only when the shared same or corresponding special technical feature is a contribution over the prior art. The inventions listed as Groups I, II, III and IV do not relate to a single general inventive concept because they lack the same or corresponding technical feature. The technical feature of Group II is providing pharmaceutical compositions comprising inositolphosphoglycan (IPG) with a pharmaceutically acceptable excipient, which is well known in the art, for example

for the treatment of diabetes. International Publication No. WO 98/11435 to RADEMACHER et al. (N) teaches pharmaceutical compositions comprising type P and type A inositolphosphoglycan (IPG) in a pharmaceutically acceptable carrier. See claim 16. The intended use of the medicament, i.e. medicaments for the treatment or prevention of an ischaemic-reperfusion injury, lends no patentable weight to the claims and cannot be the special technical feature. Therefore, the technical feature of Group II lacks novelty or inventive step and does not make it a contribution over the prior art.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even if the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
